---

## SUMMARY

---

Passionate AI developer with a proven ability to build and implement innovative applications using Python, React, and various AI technologies. Eager to contribute to challenging projects and further enhance my skills in a collaborative environment.

## PROJECTS

---

JARVIS - <https://github.com/bhaveshsinghal95182/jarvis.git>

- A Python AI application running locally on Streamlit, ensuring data privacy with Ollama. Features include various task automations, dynamic link opening, and image generation using Generative AI.
- Learned to integrate various AI models and APIs, and implement local AI solutions for enhanced privacy.

Navacharan - <https://github.com/Ayush001122/lms-github.git>

- An AI-powered Learning Management System (LMS) developed during a hackathon. Features include a rank and star-based system, student chat, file sharing, progress tracking, and an integrated AI Study Buddy to assist students.
- Learned to develop a full-stack application with React, Django, and MySQL, and integrate AI for enhanced user experience.

Sticky-Notes - <https://github.com/bhaveshsinghal95182/aistickynotes.git>

- An AI-enhanced TODO app with a sticky notes interface. Features include dynamic colorful notes, autosave functionality, and backend storage using Appwrite.
- Learned to build interactive UI with React, manage state with Context API, and integrate backend services for data persistence.

## EDUCATION

---

student at Maharishi Markandeshwar (Deemed to be university)

## TECHNICAL SKILLS

---

Python, React, AI/ML, OpenAI API, Django, MySQL, Node.js, Appwrite, Streamlit

## SOFT SKILLS

---

Collaboration, Communication, Problem-Solving, Adaptability, Time Management
